

GREAT NEWS !!

We have been in the southern Louisiana area sharpening since AUG 2006. I moved my extensive mail order business from another part of the country, and started the On-site service to help all the Gulf Coast groomers and vets after Katrina. I started sharpening in 1995. The shops I've been doing have commented on the awesome job I do, and mainly the professionalism I show them. It's a fresh relief to have someone like myself, a pet groomer and a vet tech, come into your shop and show everyone the utmost respect. This is something I hear doesn't happen in the workplace these days. I now have an office in New Orleans, and I'm the only sharpener around doing surgical instruments right on-site.

This is our basic coverage map. We have expanded this area to include all of southern Louisiana because of our new Kenner office.

The prices are reasonable, competitive, and the sharpening is done right in your driveway. Service is what drives my business, and I sharpen equipment from all over the world, and I am known as one of "America's Favorite Sharpeners". I have a very large mail-in sharpening business that goes to Mobile AL, and 200+ customers serviced with "on-site" sharpening based out of our office in Kenner LA. I would be glad to add your shop to our growing number of "on-site" clients, Just call or visit my website.

I worked around my own grooming shop and was forced to use sharpeners who's work wasn't that good, and it never got any better. Are you using a sharpener who has an attitude or persona you don't care for? Maybe a sharpener from two states away who comes every 3 to 6 months. Even though you have a lot of blades, what's going to happen in between times? He isn't going to come just for you in an emergency. I'm here every week! Are you mailing out, or worse yet, are you dropping off someplace and waiting 2 or 3 weeks for your stuff to get delivered?? Not good, you need a change!

YOU NOW HAVE A BETTER CHOICE!!

I'm a courteous, well educated Christian man who knows what goes on in your shop everyday, and I will listen intelligently to what your needs are. Great sharpening from a "World Class" sharpener, and working with a friendly courteous person is only a phone call away. Please call and take advantage of this opportunity, old habits are easy to break. It could be the best decision you ever make. I'm getting calls and referrals from everywhere in southern Louisiana. I will go where ever groomers and vets need help.

My website is filled with instructional video's that will help you maintain and fix your equipment. I have references if you ask. Other sharpeners are the only folks who talk negative about me, because when I sharpen a new client they remain a customer.
